This slide presentation has been produced by the UKFSC, as a model for you to tailor to meet the need of your company's Safety Management System.
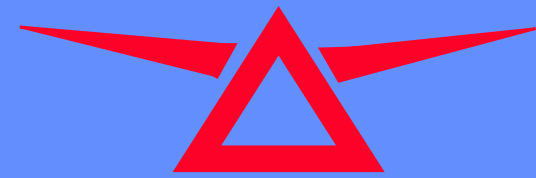

To modify it simply:

- Replace the UKFSC logo with your company logo.
- Insert your company name in the text where required.
- Modify any of the wording to accommodate your own and your company's style as required.
- Add the transitions you desire.
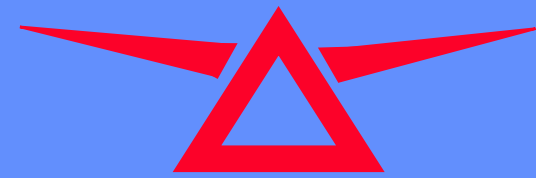

Safety Management

An introduction to

Safety Management
Safety Management

A System

- with a Safety Policy promoted and supported by the Accountable Manager
- with a comprehensive Safety Case
- with a positive Safety Culture
- with an effective Quality System

Safety Management

Positive Safety Policy

*Our companies commitment to Safety within the public arena...*

Safety Management

Safety Policy

Operator X considers Flight Safety to be fundamental to the development of our business and is committed to strengthening our Safety Culture by enhancing the partnership between management and staff. We actively encourage the reporting of accidents, incidents and events that affect Flight Safety and will not institute disciplinary proceedings when they result from errors.
Managing Director

Safety Management

Comprehensive Safety Case

This is an appropriate process for identifying hazards and conducting a risk assessment.

It is each departments responsibility to consider the impact of possible occurrences to the Safety of the Airline.
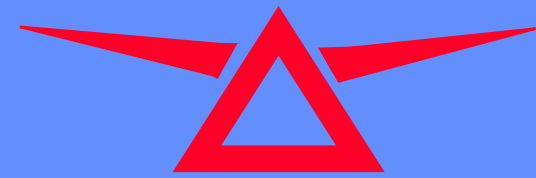

Safety Management

Safety Case

| SEVERITY		PROBABILITY OF RECURRENCE	
High	C	B	A
Medium	D	C	B
Low	E	D	C
	Low	Medium	High

Safety Management

Positive Safety Culture

This is an awareness of safety by individuals
<u>at all levels</u> within the Company.

It can only be established from the top.
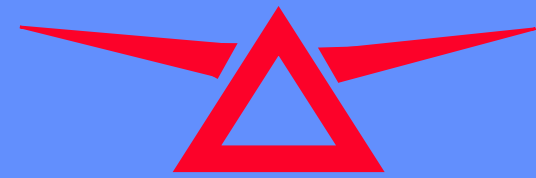

<u>From You</u>

Safety Management

Effective Quality System

Having carefully defined the procedures it is important to ensure that checks on the integrity of these procedures are undertaken regularly.
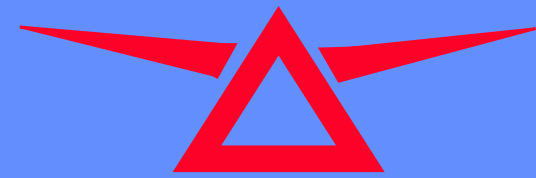

We already have a robust Quality System.

Safety Management

Safety Management System

- Visible commitment from the top
- Safety Case embracing
  - Hazard Assessment
  - Risk Analysis
